SURGEON-GENERAL J. P. GREANY, M.D., I.M.S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Bombay, 27th July 1905.

Sir,

In submitting herewith, for the information of Government, the Annual Report on the Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1904, I have the honour to observe that the statements have been compiled in accordance with the orders of the Government of India conveyed in their letter No. 678—86, dated 16th July 1904, Home Department (Medical), forwarded with this Government Resolution No. 4386, dated 19th August 1904, General Department.

2. With a view to making a comparison between the figures for the year under report and those of the previous two years the statistics relating to the different classes mentioned in the revised Statement A had to be extracted from the reports of the years 1902-1903. The time and labour spent on this have to a great extent been the cause of delay in submission of the report.

3. Statement A shows that the number of hospitals and dispensaries open on 1st January 1904 was 644. During the year under review 29 institutions were newly opened and 11 closed exclusive of those transferred from one class to another. Thus at the end of the year 662 institutions were working. During the triennial period the number of institutions opened and closed was 81 and 46 respectively, giving a net increase of 35 over the number open on 31st December 1901. In accordance with the footnote to the revised form of this statement, the Lord Harris Travelling Dispensary, Daskroi Táluka, Ahmedabad (which had hitherto been included), and the two travelling dispensaries, Supa and Yellápur (Kánara District), newly opened during the year 1904, have been excluded from this statement, whereas, owing to their being "State—Aided Institutions," they have been re-entered in the other statements relating to this class of dispensaries.

4. Statement B is a return of patients treated in the institutions of Classes I, III and IV of Statement A, and the subjoined table shows the total number of in-door and out-door patients treated in the hospitals and dispensaries of the various divisions of the Bombay Presidency during each of the past three years:—

The returns from Civil Hospitals and Dispensaries show that there was an increased attendance for all the diseases recorded, except in the case of small-pox, malarial fevers, venereal diseases, respiratory affections and diseases of the ear. There was an actual and relative lower attendance for malarial fevers, the number of patients treated having fallen from 517,345 in 1902 and 469,948 in 1903 to 409,098 in 1904. The percentage to the total treated in 1904 was 19·2 as compared with 22·4 in 1903 and 24·2 in 1902. In the Konkan, Deccan, Sind and Foreign Institutions this decrease was very slight, whereas it was most marked in Gujarát which returned 39,616 and 62,577 fewer cases as compared with 1903 and 1902 respectively. The ratio per cent. of these fevers in the different divisions was :—

	1904.	1903.	1902.
Konkan	22·4	24·4	23·9
Deccan	15·2	16·3	20·6
Gujarát	21·0	27·7	30·5
Sind	21·1	24·7	23·6
Foreign	16·2	17·8	14·6

The admissions from small-pox were fewer by 193 than in the year 1903 but show an increase of 519 over the year 1902. In the Konkan Institutions 869 cases were treated against 946 in 1903 and 232 in 1902, and in the Deccan 156 as compared with 27 and 17 respectively. The Gujarát Institutions accounted for a decrease of 34 cases over those of each of the two previous years.

Twenty-nine cases were registered in the Sind and 4 in the Foreign Institutions as compared with 19 and 25 in 1903 and 58 and 8 in 1902 respectively. Cholera is credited with 1,256 cases, or an increase of 850 and 901 over the years 1903 and 1902, and the admissions therefrom in the different divisions were :—

	1904.	1903.	1902.
Konkan	214	73	9
Deccan	960	153	13
Gujárat ...	80	1	8
Sind	2	179	325

Dysentery and diarrhœa together caused 69,154 admissions as compared with 64,375 in 1903 and 74,667 in 1902. There was a reduction in the number treated of these diseases during the year 1904 in the Deccan, Gujarát and Sind Institutions as compared with that of the year 1902, whilst the Konkan and Foreign Institutions showed an increased attendance over that of 1903. Tubercular diseases accounted for 7,949, or 1,820 and 1,748 cases more than in the years 1903 and 1902 respectively. There has been a steady decrease in the attendance for venereal diseases, the number of patients treated in the institutions of the various divisions having fallen from 55,719 in 1902 and 50,462 in 1903 to 46,687 in 1904, as shown below :—

	1904.	1903.	1902.
Konkan	9,626	11,358	13,840
Deccan	11,927	13,183	14,549
Gujarát	13,843	15,020	17,759
Sind	10,695	10,232	9,549
Foreign	596	669	522

Rheumatic affections contributed 58,447 cases against 55,335 in 1903 and 55,398 in 1902. Under the heading "Worms" 148,158 patients were treated, showing an increase of 13,259 and 12,059 over the years 1903 and 1902 respectively. The cases returned as suffering from diseases of the eye numbered 203,141 in 1904, 191,005 in 1903 and 200,619 in 1902. The attendance for ear diseases was fewer by 402 than in the year 1903 but showed an increase of 5,377 cases over the numbers treated in 1902. Respiratory affections caused 119,056 admissions as compared with 126,451 in 1903 and 123,537 in 1902. The institutions which contributed largely to this decrease were those of the Deccan, Gujarát, Sind and Foreign Divisions, whilst the numbers treated in Konkan showed a slight increase over those of the two previous years. For skin diseases and ulcers 244,394 cases were treated as compared with 231,107 in 1903 and 218,290 in 1902. The admissions from scurvy and debility and anæmia showed a slight increase over those of the years 1903 and 1902, though their ratio per cent. to the total treated have remained unchanged.

The subjoined table gives the percentage of these diseases to the total treated during the three years 1902-04 :—

The noticeable feature of the triennium under review is the steady decrease in the number of cases of malarial fevers treated in the Civil Hospitals and Dispensaries of the Bombay Presidency, which may be due partly to the cheaper sale of quinine and its appreciation by the public, and partly to the measures adopted for the destruction of mosquitoes.

6. Statements D and E record the attendance from all causes in the State—Special, Railway and Private—Non-aided Dispensaries. The total number of patients treated during the year 1904 was 1,964,278 as compared with 1,931,856 in 1903 and 1,895,045 in 1902. CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'state', when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are state dispensaries which are open to the poorer classes of the public. Class II are state dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by state railways or others.
